Summary

I'm a passionate Full-Stack Web Application Developer specializing in the MERN Stack (MongoDB, Express.js, React.js, Node.js). I transform pixel-perfect Figma designs into fully responsive, dynamic web applications using modern front-end technologies. On the back end, I craft robust and scalable RESTful APIs with Node.js and Express.js, seamlessly integrating them with MongoDB to deliver fast, secure, and high-performing web solutions. Whether it's building from scratch or optimizing existing systems, I bring designs to life with clean code, intuitive UX, and scalable architecture.

Featured Project

Alpha Clash & Recipe-Calories

React js Tailwind Css Redux Toolkit Node js
Express js Mongo DB

A small interactive gaming website built from scratch using HTML, CSS, and JavaScript. Designed for smooth gameplay and responsive layout. A restaurant order management web app that calculates calories and manages recipe orders using live data from a JSON API.
